Barolo's best value in 2022 is found among its blends.

Whether a region-wide or a village blend (as opposed to the single-MGA and even single-vineyard bottlings), these so-called 'classic' Barolos represent a sweet spot for the vintage.

The majority of wines in 2022 are round in shape with harmonising acidity and well managed tannins, and less complexity than in the best years.

This more approachable style works to the advantage of those after well priced Barolo, with a number of well performing wines to highlight below.
